Application/Control Number: 10/654,377 Page 2

Art Unit: 1713

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 62 and 13-23, drawn to a composition and method of making the same, classified in class 524, subclass 507.
- II. Claims 24-39, 57 and 40-56, drawn to ink jet recordable substrate, classified in class 347, subclass 105 and method of making inkjet recordable substrate, classified in class 347 and subclass various.
- III. Claims 58-60, 78 and 61, drawn to multilayer article classified in class 428, subclass 304.4 and method of making the same, classified in class 428, subclass various, respectively.
- 2. It is noted that the method claims are essentially composition or article claims with no specific steps recited in the method claims.
- 3. Inventions I and II as well as inventions I and III are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as fast drying coating composition for exterior applications and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that

Art Unit: 1713

the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 4. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed may be used in a different multilayer product wherein the inkjet recordable substrate is connected to a porous substrate.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/654,377

Art Unit: 1713

7. A telephone call was made to Ms. Carol on Marmo to request an oral election to the

above restriction requirement, but did not result in an election being made.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Satya Sastri at (571) 212 1112.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Wu can be reached at (571) 212 1114.

The fax phone number for the organization where this application or proceeding is

assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
